## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of Figure 1 in the reply filed on 5/1/07 is acknowledged.
2. Claims 8-13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected embodiment, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 5/1/07.

### ***Priority***

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Drawings***

4. The drawings were received on 3/5/08. These drawings are acceptable.

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3, 5-7, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoshino et al (5,739,860).

Hoshino et al, in Figures 1, 6, 8, 11, and 13, discloses a method for decoding moving picture that is the same process for controlling an audio/video digital decoder as specified in claims 1-3, 5-7, and 14 of the present invention, comprising continuous acquisition of a digital

Art Unit: 2621

audio/video stream (Fig. 13), the digital video stream being composed of a plurality of ordered sequences of images (Fig. 3); receiving a request 103 for displaying only part of the images of a first sequence of the plurality of sequences 101, and not displaying the images of the other of the plurality of sequences (e.g. skipped); responsive to the request 103, generating a video signal 102 based on only part of the images of the first sequence of the plurality of sequences 101; video decoding 7c of all the images of the plurality of sequences; and decoding the digital audio stream into an audio sequence 3 in synchronism with the video decoding.

With respect to claims 2, 3, 5-7, and 14, Hoshino et al also discloses the step of- playing the audio sequence 3; wherein the part of the images of the first sequence is a single image (e.g. 101d) of the sequence 101; wherein the acquisition is a reading from a digital medium 7a or a reception of a digital stream 7b; and wherein the video signal is intended for display 10.

### ***Response to Arguments***

7. Applicant's arguments with respect to claims 1-3, 5-7, and 14 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 2621

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
